There are 43 ID/passport photo sizes embedded into the CP1300/CP1200's firmware that are always there. To make printing US passports easy and efficient, we disable everything but the 2.0×2.0 inch size. These can quickly be enabled or disabled with ease. The following is a full list of all the sizes in the printer; these include 50x70mm for Canada and 35x45mm for much of Australia, Europe and South America:
